

Aryan Desai

Toronto, ON | 437-240-6855 | a1desai@torontomu.ca | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, C++, Java, SQL, HTML/CSS, GDScript, Bash

Web Technologies: React.js, Node.js, Express.js, Next.js, PostgreSQL, Prisma, RESTful APIs, Tailwind CSS, JWT

Tools & Frameworks: Git/GitHub, Firebase, GCP, AWS, Docker, Agile/Scrum, PyTorch, Hugging Face, Godot

AI/ML & Testing: Reinforcement Learning, Neural Networks, OpenAI API, Jest, Unit Testing, CI/CD

EXPERIENCE

Technology Director

November 2025 – Present

Google Developer Groups on Campus

Toronto, ON

- Lead development team using Agile methodologies, establishing Git workflows and conducting peer code reviews that improved delivery efficiency by 30%
- Mentor 50+ students on web development including React, JavaScript, and TypeScript through technical curriculum and workshops

AI/ML Contributor

September 2025 – Present

Byte - SecureBYTE

Toronto, ON

- Optimized codebase processing workflows using Python and data analysis, implementing automated testing that reduced failures by 35% across 1000+ scans
- Debugged and resolved API reliability issues through systematic troubleshooting, decreasing errors by 40% with documented solutions

Back End Developer

November 2025 – Present

Quantum Science and Engineering Club

Toronto, ON

- Developed backend architecture for quantum visualization platform, writing scalable code and implementing database operations
- Participated in team meetings and technical discussions, contributing to design decisions in fast-paced collaborative environment

PROJECTS

BeaverBuddy | *TypeScript, Next.js, Express, PostgreSQL, Prisma, JWT, OpenAI API*

December 2025

- Developed full-stack mental health web application for Canadian immigrants using Next.js and TypeScript, implementing secure JWT authentication and session management for user account system
- Architected Express.js backend with PostgreSQL database and Prisma ORM, designing relational schema and optimized queries to support personalized AI-generated daily check-ins and cultural integration quests
- Integrated OpenAI ChatGPT API for mental health prompts, Ticketmaster API for local events, and Gemini 3 API for custom artwork generation, delivering end-to-end solution from concept to functioning prototype

AI Racer | *Python, Godot (GDScript), PyTorch, Hugging Face, Reinforcement Learning*

December 2025

- Built reinforcement learning racing game using Godot and GDScript, implementing neural networks to train AI agents for autonomous track navigation with collision avoidance and lap time optimization
- Designed reward functions and training loops leveraging Hugging Face libraries for model training and versioning, analyzing 10,000+ episodes to achieve 60% improvement in task completion rates
- Developed real-time visualization system to monitor AI decision-making and learning progress, delivering playable prototype with dynamic track environments and optimized racer behavior

FlashFocus | *Java, TypeScript, React, RESTful APIs*

June 2025

- Built educational web application with React and TypeScript frontend, developing reusable UI components using modern JavaScript/HTML/CSS techniques
- Designed and implemented RESTful API backend with Java, managing database operations and reducing content creation time by 80% through efficient data processing

EDUCATION

Toronto Metropolitan University

Toronto, ON

Bachelor of Science, Computer Science Co-op

Sept. 2024 – June 2029

- Awarded \$6000 Entrance Scholarship for strong academic performance (90-94 average)
